NEWS FLASH

NEW TEAM MEMBER

Ron Nelson
Technical Sales

Hydroflo Controls is pleased to welcome **Ron Nelson** to its team. Ron has a strong and much admired background with over 25 years of experience in the Pulp and Paper, Mining, Power Generation and Manufacturing Industries. Ron will be at the helm of Hydroflo's new division, promoting the company's Newest Product Lines: Joh. Clouth and Lanex.

Hydroflo is now able to provide, due to Ron's previous experience with Chesteron, a complete line of Centrifugal pumps along with spare parts for most name brand suppliers.

WHAT'S NEW @ HYDROFLO

ORICA CANADA

Hydroflo recently delivered a Procal CEM system to Orica Canada, a manufacturer of Ammonia Nitrate. The system allows Orica to measure and report CO₂, NO, NO_x CH₄ on the acid stack discharge to meet ministry requirements. The RATA test was performed, and the new Procal system passed. It is currently operating to allow the plant to meet the plants C of A compliance.

SASKFERCO

Hydroflo installed a Procal P-200 CEM system to Saskferco to meet the environmental emission requirements. The system allows for the measurement and reporting of CO₂, NO, NO₂, NO_x, CH₄ and NH₃ gases at this facility, which permitted the company to meet its environmental emission requirements. Saskferco's vision is to become the best nitrogen fertilizer company in North America.

HYDROFLO CONTROLS

Hydroflo Controls announces a new partnership with world-class paper machine runnability supplier. Lanex Paper Carrier Ropes is renowned for its innovation and performance. Lanex's unique braiding procedure and patented super coating technology position them as a clear leader in the industry.

NEW ALLIANCE

Hydroflo and Joh. Clouth sign strategic alliance

Hydroflo Controls has signed a strategic alliance with Joh. Clouth to represent and support Doctor Blades, Coater Blades, Doctor Holders and system accessories. With sales support from Northern Ontario to Alberta, this partnership confirms our dedication to Canada's pulp and paper market, and solidifies our position as an unrivalled supplier of superior products, strong customer service and market value prices.

Joh. Clouth is a family-owned company that has served the paper industry as an innovative partner for 134 years. The recent investment in new state-of-the-art manufacturing facilities and equipment allows Joh. Clouth to control its costs and quality. Our partnership with Joh. Clouth will allow us to bring our business, and the success of our clients, to new heights.

The past three decades have positioned Hydroflo as a well-established sales and product representative company. We base our business around the primary industries of pulp and paper, mining, municipal and power, where we specialize in Specialty Valving, Instrumentation products and Specialty Process Controls equipment. Our company brings extensive product knowledge and application to these industries, and can provide both technical services and on-site field calibration to our service areas in Central Canada and parts of the Midwestern U.S.

"We give you control"
